## LEATHER CARE ROUTINE

Leather is a genuine material which needs caring to last a lifetime. With care it will become more beautiful and softer over the years. Leather can become dry and sometimes crack. It is also easy to get stains. Our products help you clean and care for all your leather pieces including shoes, skirts, leather bags, chairs, sofas and more.

Act of Caring has developed this simple routine to help you clean and care for your leather piece.

1.  
Start by mixing a dash of our Restoring Leather Cleanser with water in a jar to generate foam. Use a clean and soft cloth or sponge to apply the foam to your leather piece. Do not spot clean any leather, but clean the entire surface and wipe it dry. The cleanser contains organic soap derived from coconut with a high pH level and zero harmful chemicals. Use on a daily basis. Exist as a refill.

2.  
After cleaning use our Protecting Leather Balm. Use a sponge and apply wax in circles. Once covered with balm, wipe off the excess balm and polish with a clean dry soft cloth.

The protecting leather balm contains only natural ingredients and is scented with essential oils, leaves a lovely scent of forest.

Don't use leather balm on nubuck and suede but don't be afraid to use it on your skin.

The tin can be reused or recycled.

\*Always try the balm on a small area before applying to the whole piece.

Tip! Repeat the routine as often as needed.

Recommended products to use: Restoring Leather Cleanser & Protecting Leather Balm.
